4:30 pm	Close of Session

THE RESEARCH LIBRARY

Over the past 36 years, Drs. Wright and Gaby have collected and reviewed more than 50,000 scientific papers from medical journals. These papers document both the basic science and clinical research related to nutrition and disease. Major medical journals have been reviewed back to 1920; more than 500 other journals have been reviewed from volume 1 to the present. Based on the materials in this library, Drs. Wright and Gaby have expanded the therapeutic options available to healthcare practitioners. Course attendees will receive a reference manual that contains citations to more than 3,700 of these articles, including personally written summaries of more than 1,800.

Testimonial:

This course “gave me a solid foundation in the practice of clinical nutrition.”

Allan Lieberman, M.D.

Past President, American Academy of
Environmental Medicine

“A gem of a seminar, Drs. Gaby and Wright know the literature extremely well ... and you leave with many practical hints that you can use immediately.”

Michael Schacter, M.D.

Past President, American College for
Advancement in Medicine

“From vitamin A to zinc and arthritis to zoster, this seminar covers it all. I've attended three times and consider the information indispensable to my practice.”

Kenneth N. Woliner, M.D., Boca Raton, FL

“This is the best course I have ever attended. I learned so much that I could not have learned anywhere else.”

Jitka Lom, M.D., Tamuning, Guam
