

HNC Virtual Solutions: Remote Patient Monitoring

HNC's VideoDoc[®] Remote Patient Monitoring technology enables streamlined, intuitive case management with integrated web-based video, vital threshold monitoring, and health surveys. By utilizing Remote Patient Monitoring, you **can monitor vitals virtually**.

Benefits of Remote Patient Monitoring

- Eliminates patient travel time
- Eliminates waiting room time and exposure
- Reduces no show rates (reduced to less than 1%)
- Increases patient communication and engagement
- Reduces readmittance rates
- Improves overall health and vital values
- Prevents critical events through continuous monitoring
- Virtual visits at a distance
- Improves patient outcomes
- Increases education
- Increases patient accountability

Care managers can easily monitor the following vitals including:

-  Pulse Rate
-  Blood Pressure
-  Blood Glucose
-  Temperature
-  Oxygen Saturation
-  Weight
-  And More!
