

# You help people look their best, but who's looking out for you?

The aesthetic laser industry is broken. Laser manufacturers sell you expensive equipment and then continue to charge you every time you use it. Their contracts try to lock you in and leave you with fewer choices and higher prices.

Sentient Lasers says no to this exploitation of doctors and medical professionals. **The choice should be yours.**

**We are your ally and champion, fighting for fairer business practices and a more honest aesthetic laser marketplace.**

We want you to be able to choose the equipment that's best for you and offer it at a fair and reasonable price. From our founding, our primary focus has **always** been to refurbish and maintain medical laser and energy devices. Our experienced technicians are always looking for new and groundbreaking solutions to ensure the highest quality and most affordable lasers possible

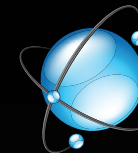

**BLUEDOT**  
CERTIFICATION 

This is why we have worked closely with doctors and medical professionals to create the Blue Dot Certification®, guaranteeing that every laser you touch is safe, effective and meets the highest standards in the industry.

Our Blue Dot Certification® gives you confidence in the technology that is critical for your business. When you can trust this technology, your patients can trust you.

Look to Sentient to be your indispensable high performance champion in the fast growing aesthetic laser business.
